DETAILED ACTION

Election/Restrictions

1. Claims 6, 7, 9-13, 27-30, 33 and 34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species or group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on March 28, 2005.

Claim Rejections - 35 USC § 102/103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5, 8, 14-26, 31, 32 and 35 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 1266648.

The reference discloses a cosmetic composition comprising a liquid lipid phase containing silicone oil, corresponding to presently claimed component (ii), wherein said composition is structured by a combination of polymeric gelling agent having polyorganosiloxane groups, corresponding to presently claimed component (i), solid particles, embracing powders of crosslinked hydrophobic polymers or copolymers (e.g., powder of silicone

elastomer polymethylsilsesquioxane) and an amphoteric siloxane. The mixing of the silicone elastomer powder and amphoteric siloxane would give rise to a silicone surface coated silicone elastomer powder, reading on the presently claimed component (iii).

The disclosure of the reference appears to meet all the requirements of the present claims in terms of the types of materials added. The onus is shifted to applicants to establish that the product of the present claims is not the same as or obvious from that set forth by the reference.

Response to Arguments

5. Applicant's arguments filed August 8, 2006 have been fully considered and are persuasive to the extent that the rejection over Hansenne has been withdrawn..
